DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In accordance with discussions made in a telephone interview with the inventor's representative, Mr. Paul Kravetz on July 26, 2005, the following changes have been made:

- a. In claim 4, line 11, delete the word "when".
- b. In claim 4, line 21, delete the word "when".

Reasons for Allowance

Claims 1-12 are allowed for the following reasons:

The instant application is deemed to be directed to a non-obvious improvement over the invention described in U.S. Patent Application Publication 2003/0035619 to Pfeiffer.

Independent claims 1 and 11 are allowed because the prior art of record, taken alone or in combination, fails to disclose or render obvious a control section for, when the filter characteristics of one of the first and second filter sections is required to shift in the frequency axis direction to exceed the variable range, relatively controlling the filter

Art Unit: 2883

characteristics of the first and second filter such that a switching is performed from one of the first and second filters to the other of the first and second filters provided the overall combined filter characteristic becomes constant to allow the filter characteristic of the other of the first and second filter sections to shift in the frequency axis instead of the filter characteristic of the one of the first and second filters in combination with the rest of the limitations of the base claim.

Claims 2-10; and 12 depend on claims 1 and 11 respectively and therefore they are also allowed.

Pfeifer describes connecting two periodic filters (Mach-Zehnder devices) in series, one of which is used for fine-tuning. However, the reference is silent with respect to the controller as described above which performs a switching operation between the two filters such that the overall filter characteristic is constant to allow the filter characteristic of one of the filters to shift instead of the other filter.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
